

Crypto in the USA 30-10-2025:

The crypto industry in the United States is arguably the widest market in the world. As the world's largest economy, the US plays a pivotal role in the trajectory of global trade and cutting-edge technologies including cryptocurrencies.

The US market was responsible for \$1.3 trillion in on-chain transaction volume between July 2023 and June 2024, making it the world's largest market according to Chainalysis.

Key players including the Coinbase and Kraken exchanges are based in the US, as is the stablecoin issuer Circle, and the cryptocurrency firm Ripple (XRP). The US is home to major Bitcoin mining operators including Marathon Digital Holdings, CleanSpark, and Riot.

US dominance is supported by institutional involvement that outshines any other region globally. Approximately 70% of the region's on-chain activity consists of transfers in excess of \$1 million dollars.
