BIP39
A Simple Phrase That Holds Your Crypto Keys

BIP39 is a standard that allows users to back up their crypto wallets using a set of everyday words. Instead of dealing with complicated keys, users get a readable list of 12 to 24 words known as a mnemonic phrase. These words are carefully selected from a list of 2048 to reduce confusion and improve reliability. The phrase can be combined with a custom passphrase to generate a secure cryptographic seed. This seed enables the recovery of an entire wallet, including all associated accounts and addresses. BIP39 has become a trusted method for balancing usability and strong security in the crypto world.
