

A seed phrase is a series of words generated by your cryptocurrency wallet that gives you access to the crypto associated with it. Unlike traditional banking systems, cryptocurrencies operate without a central authority, using blockchain technology for secure and transparent transactions. The seed phrase is a human-readable backup of your wallet's private key and must be stored safely. If lost, you may permanently lose access to your funds. This method ensures decentralized control and aligns with the core principles of crypto security and ownership.

## Seed Phrase List

credit honey snack burst horn deer trouble brother trial super salt traffic	woman future settle approve setup idle invest wonder clarify source rain reunion	join above usage guilt fruit very diagram dream universe jar screen orphan	market attack gadget mango outside once unhappy birth average snap cool air
